Conclusions and recommendations

The Syrian government have blatantly violated both the International Humanitarian Law and the norms of the Humanitarian law and committed crimes that can be openly classified as war crimes when it targeted medics as well as crimes against humanity through these numerous acts of killing.

The Security Council

The Security Council should shoulder its legal and moral responsibilities in respect to what happening in Syria instead of only watching the daily bloodbath only becoming bigger.

Russia and China should stop protecting the Syrian regime after it was proven that it has perpetrated war crime and crimes against humanity. Also, the International Community should take further steps to protect the lives of the Syrian people if Russia and China didn't change their positions.
