

Syrian security branches and Persons in charge

Documented by SNHR

Syrian regime Forces according to the latest survey carried out by the Syrian network for human rights , arrested not less than (215, 000) Syrian citizens, including nearly 9,000 under the age of eighteen, 35,000 university students, almost 4500 women (800 of them faculty student) , and at least(80,000) forcibly disappeared.

The detained in Syria has been subjected to various types of violence , torture, claimed the lives of 2305, including 80 children and 25 women until 31/03/2013.

[The following link](#) shows distribution and documentation identified by name, date, place, image and video to many of them.

Thirty four children has been tortured to death . [The following link](#) shows the children who died under torture verified by date , place and distribution in the Syrian governorates.

There are 25 women also tortured to death in the dungeons of prison , which indicate to use systematically very drastic methods against women detainees, [the following link](#) gives names , dates and special videos of torture female victims.

It has been a necessity to recognize the highly detailed intelligence services and the main affiliate branches and those who in charge , because it is the real headquarters that brutally tortured thousands of the Syrian people and killed hundreds of them under torture, not to mention that there are at least 700 rape cases took place in those branches

We indicate that these branches are what we could recognize them and there are dozens of secret detention centres (we know nothing about it yet) deliberately opened by the Syrian regime where horrible actions took place there and intended to escape from responsibility and accountability pretext that they are not subject to them and no one knows bout .

First: Officials OF the Security Agencies:

Note: The Syrian network for Human Rights notes that the procedure of obtaining security branches leaders names in all of Syrian governorates was very difficult because they are surrounded by an aura of secrecy and confidentiality , so we would like to indicate the possibility of some errors (not to exceed 5%) for some of the names who might be isolated and we did not inform of that , therefore we register them that they are still on top of their work, except All of these things ,the remaining things are very accurate in a very high rate.

The most prominent officials in Syria for security agencies as supervisors and the direct responsible for the torture and death due to torture (mostly belonging to the Alawi sect ratio above 98%)

Major General / Shafiq Fayyad

Major General /Hassan Khalil

Third: Syrian intelligence agencies and basic branches details :

Security agencies are divided into four main sections:

Military Intelligence (military security)

Air Force Intelligence

State Security (GID)

Political Security

A group composed of 48 basic branches in addition to the “regional” branches in the provinces We stress that there are dozens of secret headquarters in various places and neighborhoods in the Syrian governorates could not be documented.

The most repressive of those agencies and the most sensitive, military intelligence and air intelligence while the Political Security is one of the most pervasive and invasive agencies among people and controlling them .

Each of those agencies are divided into branches (in the cases of the military intelligence and the General Intelligence, each branch has number of three digest known to it while in the cases of Air Force Intelligence and the Political Security realizes branch by its name) and each branch of these agencies is divided into sections and each section is divided according to specialization : to detachments or to cells (in the case of external activity) or to groups.

Thus, the Pyramidal division from the top to bottom as following :

Intelligence Agency - Branch - section - detachment, group, or cell (depending on the task).

Those agencies have relationship with two security offices are:

National Security Bureau

Presidential Guard office (officially called private office).

Security organizations structure

Numbering: about 120,000 soldier , corporal and officer distributed on 4 security agencies, consists of 48 essential security branches, in addition to regional branches in the provinces Statistics before the revolution estimated the number of employees in the intelligence services about 90 thousand between officer ,corporal and civil servants, mostly belong to the Alawi sect, and indicate that this number does not include informants and Reports writers deployed both among the people or within the military , in the state institutions , these numbers are not included with the Non- Syrian agents and security officers of military formations or airports or battalions of air defence and security officers embassies and government institutions because those are considered as army personnel or air force or personnel of the Ministry of Foreign personnel (in the case of embassies) or the police and Central Security) in the case of internal structures (they are linked with the intelligence services coordinators fully but are not considered within the personnel of those agencies.

Intelligence officers, has a population of approximately 2000 officer (not including who gifted honorary ranks as a result of services they provided), more than half of them are from Alawi sect.

Military Intelligence (Military Security Branch)

S Branch Brief description

1. branch 291 Headquarters Branch: the main center of the organization and contains all the personnel files within this agency
2. branch 293 Officers Security Branch: Responsible for monitor army officers and play a major role in the upgrade , the deportation or transfer of military officers or appointing them to their positions, the head of this section has direct contact with the President of the Republic

3. branch 294 Military security branch: monitors all sections of the army and the armed forces (with the exception of the Air Force and Air Defense)
4. branch 235 Palestine Branch: one of the most cruelty branches of military intelligence, it was allocated in the beginning in monitoring the Palestinian organizations and Palestinian refugees residing on Syrian land and expansion in the reign of Hafez al-Assad to include his chase Islamic movements and penetrate and try to guidance and control if necessary or create Islamic movements and fake terrorist organizations as Alnasra organization that follow the Syrian regime and is different from the Alnasra of al-Qaeda.
5. Branch ??? Information Branch: specializes in general information for agency make and various studies ,the Branch also monitors the activity, local media and global audio-visual and video (including the Internet)
6. branch 211 Technical Branch also called Computer branch and employs high human competencies and with a good level of culture specialise with Internet and Computer
7. branch 225 Communications Branch and staffed by high human efficiencies with a good cultural level and specialized in internal and external communications made by telephone, mobile or fax and can directly control all communications inside Syria
8. branch 237 Wireless Branch, it is concerned with a special survey of radio waves and wireless call tracking and bugging them or disturb or interfere with
9. branch 248 Military investigation is serve as the main investigative body for the military security service (although each branch of the central agency and Regional owns the special investigation section) and is the second hardest branch in the agency in terms of human rights violations after the Palestine Branch
10. branch 215 Raids and storming
11. branch 216 Patrols Branch
- 12 branch 220 Intelligence Branch of the front: also called Branch Sasa:
It is for intelligence affairs of the occupied Golan and the forces of the front and also monitors the international emergency forces operating there
13. branch 227 Damascus Branch also called Area Branch
14. branch 261 Branch of Homs Governorate
15. branch 245 Branch of Daraa Governorate
16. branch 219 Branch of Hama Governorate
17. branch 222 Branch of Hasaka Governorate
18. branch 271 Branch of Idlib Governorate
19. branch 290 Branch of Aleppo Governorate
20. branch 243 Branch of Deir Ezzor Governorate
21. branch 221 Branch of Badia also called Branch of Palmyra

Air Force Intelligence :

It's a very vague organization and loyal to the regime and most reliable and is charged with the of confidential and sensitive tasks, the information known about it less than the rest of other security agencies cause of the secret nature of this agency in spite of it consider small compared to other agencies , and the scarcity of inadvertent contact with civilians before the revolution, except in special cases and this is the first agency between the intelligence agencies of the Syrian regime in terms of human and technical competencies and most of its elements belonging to the Alawi sect and very, very few of the other sects.

S Branch Description of the Branch :

22. Administrative branch It is the center of the agency that contains

files of all employees within this agency

23. Information Branch It specializes in general information and various studies for the agency and contains many divisions (including religions division and political division) also this Branch monitors Media activity of local media and global audio-visual and visual (including the Internet)

24. Investigation Branch It is the main investigative body for the Air Intelligence (although each branch of the central and provincial agency has the special investigation section) is considered the most severe branch and violates all norms and laws of human rights where they using very violent methods of torture.

25. Airport Branch Located within Mazza airport and is responsible for the security of the airport and presidential security of the presidential plane and perhaps this section is also responsible for intelligence tasks related to personal security for President during his travels abroad

26. Operations Branch Responsible for internal and external operations of the agency including matters relating to Air Force require externally intelligence effort

27. Special Operations Branch Information about this section is rare and started talking about it effectively during the Revolution for its involvement with some violations and abuses against protesters and activists.

28 Special Tasks Unit Also little information about it and there is some information about being responsible for providing support to special operations and sub-tasks

Regional branches they spread among Syrian provinces ,there is a responsible branch for each Governorate or comprehensive sector in several provinces ,

each branch covering section of the geographical segments which are also divided into Air Force and Air Defense (It is known that the leadership of the Air Force and Air Defense divided the country for several sectors and each sector has his military leadership ,Air Force Intelligence established regionally branch for every sector of those sectors), and every branch followed by a number of sections as needed and each section followed by a number of detachments as needed.

each regional branch is responsible for both civil and military airports, air defence bases within the geographical segment ,contains files for all officers and worker soldiers ,pilots and hosts of civilian airport.

not to mention that each civilian or military airport has its own security officers (also security officers for each air defense battalion, for example) this officer is linked and coordinated directly with the Air Force Intelligence Branches in charge of the sector in which the airport is located or air defence formation and related with security branch more than with the chief in the airport, which is an officer of the security or the commander of the formation of air defense, who is an officer of the security, which makes the order made by airport security officer is more powerful than airport chief or air defence formation. We should mention that any departure of aircraft must be done with the consent and coordination with the Air Force Intelligence branch to which the airport is connected, it is noteworthy that the least important branches of the air intelligence have detention centres inside a number of air bases

State Security (GID)

some call it by error “the General Security Service (GSS) by mistake in output for the label (where the agency is called administration of GID) and its branches have three numbers of its own and its branches are located in Damascus exclusively.

S Branch Brief description :

29. Branch 111 Administrative branch which is the heart of the agency, it contains files of all employees within this agency also monitors the employees within to prevent any gap , it plays a role in the upgrade, the deportation or transfer of employees within the agency .

30. branch 251 Internal Branch and some call it by mistake the state security branch while naming the State Security launches the General Intelligence Service as a whole as some call it by mistake internal security while the internal security forces fired on the police force under the Ministry of the Interior and specializes this section to monitor different political groups and monitor political activities in addition to monitor any signs of an armed opposition (especially from Islamic currents) One of the sections of his department called anti-terrorism department of a similar nature to the nature of the anti-terrorism department of the Palestine branch in the military security service

31. branch 255 Information Branch, a branch specializes in general information of the agency and various studies concerning it and has a lot of different departments (including the Department of Religions and political parties) and the branch also watches activity of local media and knowledgeable audio-visual and video (including the Internet) and deal with it also directly or indirectly including matters of the agency as it specializes in services related to computer and Internet-related agency is similar to the branch’s Technical for the military security

It is worth mentioning that the section 255 with heavy activity on the Internet and oversees the monastery on many sites pro-regime or suspicious sites that claim to be with the opposition, in addition to his propaganda activities to send comments and posts in the net and play with other branches an important role in overseeing the so-called Syrian army-mail

32. branch 279 External branch which is responsible for activities of intelligence outside of Syria and this branch is responsible for most of the intelligence activities outside Syria more than any other branch of the branches that operate externally in intelligence of the system and

different DNV this section job is to monitor the Syrians abroad and work against the opposition abroad as it also monitors the Syrian diplomatic missions and take over security duties in respect of diplomatic missions and a division of this ,the section is responsible for monitoring the Syrians during their Hajj and Umrah.

33. branch 300 Espionage Branch and also called anti-espionage branch has internal and external tasks related to the exercise of espionage and counter-espionage and mentions that this section monitors every one enter Syria from foreigners and non-Syrian Arabs.

34. Branch ??? Training Branch, this branch is responsible for training officers and intelligence and conduct courses for them (security information course , document security course, investigation and interrogation course ,counter terrorism course ,studies security course to protect important personalities , security installations course and monitor and track course. etc.) It is worth mentioning that Syrian employees in intelligence services of other people are doing their courses in this section before handing them over their duties in their agencies and this section even trained jailers and executioners on their work and trains officers also how to investigate and the arts of use and innovate various torture methods ; psychological, physical and ways ti destroy detainee psychologically ,and to indicate that this section deals with non-Syrian intelligence officers from allied countries of the system such as the Soviet Union and ex- Romania to do the job in training courses on various disciplines.

35 branch 285 Investigation Branch which is a main investigative body for the state security agency (although each branch of the central and provincial agency has special investigation department)

36. branch 295 Branch raids and storming

37. branch 318 branch of Homs Governorate

38. branch 322 branch of Aleppo Governorate

39. branch 327 branch of Deir Ezzor Governorate

Regional Branches It has branches in every province that has followed this departments at the district level and detachments respects level

S Branch Brief description :

40. Administrative branch

Information branch Is the heartbeat of the agency contains files of all employees, within this agency also monitors the employees within to prevent any gap and plays a role in the upgrade or the deportation or transfer of employees within the system.

Information Branch, a branch specializes in general information of the agency and various studies related to it and has a lot of different departments (including the Department of Religions and political parties) and watching section also local media and knowledgeable audio-visual and video activity (including the Internet) and deal with it also directly or indirectly including matters of the system.

41. Investigation Branch It serves as the main investigative body for the PSO (although each branch of the central and provincial system has special investigation department)
42. Operations Branch Responsible for operations carried out by the system, which serves its activity and its objectives.
43. Patrols Branch External branch which is responsible for activities of intelligence outside of Syria and this branch is responsible for most of the intelligence activities outside Syria more than any other branch of the branches that operate externally in Syrian intelligence services and different DNV this section to monitor the Syrians abroad and work against the opposition abroad and also monitors the Syrian diplomatic missions and take over security duties in respect of diplomatic missions and a division of this section is responsible for monitoring the Syrians during their Hajj and Umrah.
44. Branch of political parties It is responsible for the political parties and its control and monitoring of any political opposition activity.
Branch of students and student activities: sometimes called a branch of Student Affairs is responsible for monitoring the students and their student activities and has files on all university students in Syria.
45. Branch of wanted and observers Is a branch dedicated to navigation, surveillance and follow-up
46. Government institutions Security Division Its mission is to monitor the government (ministries and the prime minister) and public institutions of the state , supervise it and even monitors the minister and general managers and record information about them and their movements.
47. licenses Branch A section responsible for licensing and assumed all real estate office or shop cell phones or vegetable shop ... Etc. to obtain a license through it
48. Prisons Branch The regional branches spread in all provinces of the country and follow its sections covering all areas within each province and belongs to those sections detachments covering all aspects within the region so as to cover the country completely (a branch in every province and department in each region and a detachment in each side) this side can never be seen without detachment security policy) and holds branches regional monitoring mission citizens along the diameter and the detachments and departments recruit informants within the ranks of citizens every where you live in and receive reports from them and archiving, organization and sent to the Special Branch to maintain as there is in the Political Security branch private maintain a file for each citizen of the population are recording information about continuously renewed by potential and coordinate regional branches work with branches central agency in the event of overlapping of work between them, mentioned that the regional branch of the private province of Damascus called city branch and oversees this section on the central prisons (Prisons Civil) has added to administrative section and Investigation section distributed over the central prisons that have several functions such as administration of direct political section CSS inside the prison, where it is known that political detainee after finished his interrogation in the intelligence branches are converted to either a military prison and to either politi-

cal section closed in a central prisons (Civil) and the detachment security policy management section closed political prison while The police administration wings of prisoners judicial, in addition to control prisoners judicial inside other suites (where they are recruiting prisoners inside dormitories as informants on the rest of the other prisoners) and also monitor the prison administration and police recruits working within , and in addition to the establishment of this management branch closed political divisions within central prisons, it also has special files of prisoners and judicial police and state employees working within the central prisons.

Regional branches The regional branches spread in all provinces of the country and follow its sections covering all areas within each province and belongs to those sections detachments covering all aspects within the region so as to cover the country completely (a branch in every province and department in each region and a detachment in each side) this side can never be seen without detachment security policy) and holds branches regional monitoring mission citizens along the diameter and the detachments and departments recruit informants within the ranks of citizens every where you live in and receive reports from them and archiving, organization and sent to the Special Branch to maintain as there is in the Political Security branch private maintain a file for each citizen of the population are recording information about continuously renewed by potential and coordinate regional branches work with branches central agency in the event of overlapping of work between them.

Fourth: the most prominent sites of the security services (Syrian network for Human Rights owns Google Earth file that has been working on it for many months, it displays all security sites , prisons and detention centers).

We will recall the sites that highlighted security branches and indicate that the danger really lies in the existence of dozens of secret prisons as some villas and some buildings that follow its ownership of the leaders in the security services and the secret prisons are to get the hardest torture and rape, as well as schools, churches, mosques, hospitals, sports stadiums, theaters and many underground cellars.
