

## Not less than 396 Major Breaches during the Second Round of Negotiations 93% of them by the Syrian regime and its allies

- I. Introduction
- II. Executive Summary
- III. Details of the New Incidents
- IV. Recommendations
- V. Attachments and Annexes
- VI. Acknowledgment

### I. Introduction

In this report we review the outcome of the violations during the second round of negotiations in the period between Wednesday 13 / April / 2016 and Wednesday 27 / April / 2016. SNHR noted the increasing of violations committed by the signatories of the cessation of hostilities agreement, particularly government forces and its ally Russia at a rate of 1.5 times higher that we already recorded during the first round of negotiations, where the pace of massacres increased, in addition to the increase of targeting civilians, the vital civilian facilities, and the medical cadres. However, the arrests have not undergone any improvement at all, and no one has been released, but the outcome of detainees rose. What are worse are the death operations due to torture, which amounted to 11 documented cases.

In addition, the government forces have continued to disrupt the entry of aids to the besieged areas. «Darya» city has not received any assistance so far. As the aids to Al Waer Neighborhood had stopped since 10 / March / 2016 and is still going on so far. This does not mean that the rest of the regions are better off; first, because aids are barely enough; second, and most importantly, there should be releasing the fully blockade -according to the rules of international humanitarian law and the resolutions of the Security Council nations, from all regions. The current Syrian government still requires from the United Nations and its implementing partners and any relief organizations to get

approval to enter the besieged areas, often, these approvals are rejection after going through complexities, rather than facilitate access for such assistance.

We aspire in SNHR to turn the cessation of hostilities agreement to cease-fire destruction of all Syrian territories without exception, and then build on it in the political process of justice to the victims and provide them justice, in addition to rebuke all violations perpetrators, starting with the major cause of all what is happening in Syria which is the current regime and who is the main perpetrator for nearly 90% of the violations against the Syrian people.

## II. Executive Summary:

The number of breaches we documented during the second round of negotiations since the 13 / April / 2016 to 27 / April / 2016 not less than 396 between military operations and arrests which are distributed according to the signatories to the statement of the cessation of hostilities:

### III. Recommendations:

- We ask the joint American and Russian committee to investigate these incidents, announce its results to the Syrian people and prevent it from happening again.
- We demand the international community to correlate the ceasefire with political efforts that would pave the way towards a transitional stage that would result in a democratic regime, which will end the suffering of the Syrian people.

If breaches are still being committed, then this fragile ceasefire may fail at any moment. Since USA is a major advocate for this agreement, then it should persuade the Russian government to cease its airstrikes and pressure its ally the Syrian government to do so.

### IV. Attachments:
